

PORTFOLIO

**Lifetime Warranty
& Tech Support**

Bringing advanced skincare Technologies into homes. Our commitment to provide professional grade devices that last a lifetime.

Our Brand

Spacetouch has pioneered the journey to redefine skincare with its advanced light therapy technology. The company stands out as a leader in the industry, combining state-of-the-art technology with practical, user-friendly designs. It all began with the simple yet powerful idea of bringing professional-level skincare into the homes of everyday users.

The genesis of Spacetouch was marked by the introduction of innovative devices like the Vega, Cosmo, Nova, and Luna, each designed to target specific skincare needs using LED light therapy. These devices incorporate technologies initially developed by NASA, demonstrating Spacetouch's commitment to harnessing cutting-edge research for skin health. Their technology spans across various spectrums of light each tailored to treat different skin concerns, from aging and acne to inflammation and pigmentation.

Their portable, sleek designs are coupled with user-friendly interfaces, making advanced skincare a simple addition to daily routines.

What sets Spacetouch apart is not just its technology but its dedication to accessibility and convenience. The devices are designed for use at home, on the go, or wherever life takes you, ensuring that premium skincare is always within reach.

Each product from Spacetouch, whether it's the full-body LED therapy from Cosmo or the targeted treatment solutions from Vega and Nova, carries the promise of efficacy backed by clinical studies. These studies validate the significant impacts on skin health, from reducing wrinkles and fine lines to enhancing skin hydration and texture.

Spacetouch's journey is more than just about selling devices—it's about empowering individuals to take control of their skin health with technology that is effective, reliable, and easy to use. With a global reach and a profound impact on its users, Spacetouch continues to innovate and lead in the light therapy market, promising a future where skincare meets technological sophistication and practicality.

Reviver

Reviver Pain Relief

[Click Here For Product Page →](#)

Reviver Pain Relief is designed to deliver targeted comfort using advanced red and near-infrared light therapy. By penetrating deep into the skin, it helps reduce inflammation, ease muscle tension, and support faster recovery. Combined with gentle heat and innovative technology, it improves circulation and promotes the body's natural healing process—providing effective relief for everyday discomfort, post-treatment sensitivity, and muscle soreness.

Reviver Heads

[Click Here For Product Page →](#)

EMS Head

The Blue Light setting is designed to improve skin texture and reduce sebaceous hyperplasia (enlarged oil glands). It can assist in reducing the appearance of actinic keratoses (sun spots), acne, and even acne scarring. In addition to its cosmetic benefits, blue light therapy has been shown to promote the synthesis of protein and bone collagen, and it can also help with whitening skin and teeth.

IR + RED & Topical Heat Head

The Red Light setting is designed to reduce signs of aging. The treatment assists with the reproduction of cells, collagen, and fiber and reaches the hypodermis level, the deepest and thickest layer of the skin. Consistent use of red light LED treatment can effectively halt the reduction of collagen as we age and in some cases, even boost the body's natural collagen production.

IR + Blue Light Head

The infrared light penetrates deep into the skin, promoting increased circulation and stimulating collagen production. This process aids in reducing fine lines and wrinkles, resulting in a more youthful appearance. Meanwhile, the blue light component is known for its ability to target bacteria that cause acne. This feature helps reduce breakouts and prevent future blemishes, promoting a clearer complexion. The blue light also assists in calming inflammation, which can lead to a more even skin tone.

Pro Laser 940NM Head

The Pro Laser - 940NM is designed to rejuvenate the skin in the comfort of your home. The laser delivers fast, potent, and painless results for your entire face, neck, chest, and hands. Clinically validated, it significantly reduces fine lines and wrinkles by utilizing advanced non-fractional, non-ablative technology. This method gently warms the dermis, enhancing collagen production and unveiling firmer, younger-looking skin in just 90 days.

Microneedling Head

The Micro-needling Head is a cutting-edge skincare tool designed to rejuvenate your skin by promoting natural collagen production. This precision-crafted device gently creates microscopic punctures in the skin's surface, enhancing the absorption of skincare products and resulting in a smoother, firmer, and more youthful complexion. Safe for all skin types, its innovative technology reduces the appearance of fine lines, wrinkles, and scars with minimal discomfort.

Pain Relief Head

The Pain Relief Head is designed to deliver targeted comfort and recovery using advanced red and near-infrared light therapy. It helps reduce inflammation, improve circulation, and ease muscle tension and joint discomfort. This clinically inspired treatment supports faster healing and is ideal for relieving soreness, post-procedure sensitivity, and everyday pain. With consistent use, it promotes relaxation and restores comfort for both face and body.

Reviver Ampoules

Experience our revolutionary skincare ampoule, crafted exclusively for use with the Reviver device. Setting a new standard in lifting, toning, and anti-aging treatments, this cutting-edge formula combines 23 meticulously selected ingredients.

Skin Repair Ampule

Meticulously designed to illuminate and rejuvenate your complexion when used with the Reviver device. This state-of-the-art ampoule, combined with Reviver's LED, infrared, and EMS technologies, targets and diminishes the appearance of dark spots, evens out skin tone, and enhances your skin's natural glow.

[Click Here For Product Page →](#)

Lifting & Toning Ampule

Designed exclusively for use with the Reviver device, setting a new standard in skin lifting, toning, and anti-aging treatments. This cutting-edge formula is a symphony of 23 meticulously selected ingredients, each playing a crucial role in rejuvenating your complexion, all while working in harmony with LED and EMS technologies to enhance absorption and efficacy.
